

**Deliver
Incredible Care
With Us!**

Together, we can make a difference!

Spanning three acute hospitals, two community hospitals, three national centres, six polyclinics, three family medicine clinics, and three health science institutions, our unique and comprehensive ecosystem anchors NUHS as a leading academic health system in Singapore – driven by research and education.

Inspired by our patients and the population that we serve, our strong network of talents and resources across our institutions provide patient-centred care across the whole continuum – improving health and driving transformation from primary, tertiary to complex care. In close collaboration with our community partners, we aim to deliver “Incredible Care and Health, Together”!

Join the OneNUHS Family!

A Healthy Community
Shaping Medicine.
Transforming Care.

Consultant Histopathologist, Pathology

National University Hospital

As a member of the National University Health System (NUHS), the Department of Pathology in National University Hospital (NUH) provides centralised pathology services to all hospitals within the NUHS Cluster. In addition, the department provides pathology services to external hospitals and laboratories as well. The department has a strong clinical service culture combined with research and involvement in undergraduate, residency and fellowship training.

Responsibilities

- Work independently as a Consultant Pathologist in a general hospital served by the department;
- Complement existing expertise in the department, which includes six contributing authors in the WHO Classification of liver, skin, gastrointestinal, gynecological, hematolymphoid, and head and neck tumours;
- Clinical duties includes:
 - a. Reporting of histopathology and cytopathology cases, which may include the use of digital pathology
 - b. Performance of frozen section consultations
 - c. Attendance at clinico-pathology conferences
 - d. Perform administrative duties as directed by the Head, Department of Pathology

Requirements

- Established track record of clinical excellence in anatomical pathology;
- Broad experience and deep expertise in the practice of general histopathology;
- Expertise in the fields of gastrointestinal pathology, breast pathology, lung pathology and molecular pathology will be an advantage;
- Possess basic and postgraduate medical qualification(s) recognised by the Singapore Medical Council such as FRCPath, FRCPA or US Board certification in Anatomical Pathology. For candidates with US Board certification, they also have at least two years of Fellowship in one or more pathological sub-specialties;
- Able to work independently and in a team, have an investigative nature, attention to detail;
- Knowledge of LIS systems and use of computer applications, e.g. MS office, PowerPoint
