

Assistant Professor (tenure-track) and Professor (tenured) positions

ISTA invites for faculty applications in **Chemistry, Computer Science, Data Science, Earth Science, Life Sciences, Mathematics, and Soft Matter Physics**

We welcome applications for **Assistant Professor (tenure-track) and Professor (tenured) positions** in the following areas:

Chemistry

Computer Science, candidates from CS systems are especially encouraged to apply.

Data Science with a focus on candidates in statistics and bioinformatics.

Earth Science in all areas with the exception of solid earth.

Mathematics

Experimental Soft Matter Physics broadly defined, including biological physics.

We welcome applicants for **Assistant Professor (tenure-track) positions** who want to start their first independent research group in

Life Sciences. A special area of interest is neuroscience.

Interdisciplinary candidates bridging between areas are particularly encouraged to apply.

Assistant professors start with independent group leader positions for six years, progressing to tenured positions after a positive evaluation by international peers.

Tenured positions welcome distinguished scientists with proven leadership in research.

At ISTA, we promote a diverse and inclusive working environment and are committed to the principle of equal employment opportunities for all applicants, free of discrimination. We strongly encourage individuals from underrepresented groups to apply.

The Institute of Science and Technology Austria (ISTA) is an interdisciplinary research institution that combines basic science research with graduate education in theoretical and experimental research in Mathematical and Physical Sciences, Life Sciences, and Information and System Sciences. ISTA (www.ista.ac.at) invites applications for Assistant Professor (tenure-track) and Professor (tenured) positions in the areas mentioned above.

Why ISTA

- Impactful research in a vibrant, international, and interdisciplinary research environment.
- Advanced facilities and comprehensive scientific support.
- Attractive salaries and generous resources.
- Guaranteed annual funding, including support for PhD students and postdocs.
- Graduate school with highly selective admissions.
- Professional development opportunities and employee support services.
- On-campus childcare facilities.
- Inclusive working environment.

- Proximity to Vienna, consistently ranked among the most livable cities worldwide.

Take the next step in your academic career and apply at: www.ista.ac.at/jobs/faculty/

Application deadlines:

October 24, 2024 for Chemistry, Data Science, Earth Science, Life Sciences, Mathematics, and Soft Matter Physics

November 28, 2024 for Computer Science
