

Full Professorship of Hydraulic Engineering, Water Resources Management and Hydraulics (m/f/x)

- At the Faculty of Civil Engineering Sciences / Institute of Hydraulic Engineering and Water Resources Management
- Starting on October 1st 2024, permanent employment contract (according § 98 UG)
- Application Deadline: April 30, 2023

TU Graz is the most traditional technical and scientific research and educational institution in Austria. In its five areas of strength, the Fields of Expertise, TU Graz achieves top international performance and relies on intensive cooperation with other research and educational institutions as well as with business and industry worldwide. In the European higher education landscape, TU Graz is increasingly competing for the best minds and resources.

PROFILE

We are seeking a candidate with an outstanding scientific track record who is able to develop a strong and visible research program in the field of Hydraulic Engineering, Water Resources Management and Hydraulics. Potential research fields are the adaptation and optimization of hydraulic infrastructure in the context of climate change and energy transition as well as sustainability and ecology. Other potential fields of research are the condition assessment of hydraulic structures and strategies for rehabilitation, flood risk reduction and the design of flood protection systems as well as the combined application of experimental and numerical methods.

Involvement in teaching at bachelor's, master's and doctoral levels in the relevant courses at the faculty of civil engineering is mandatory. In-depth courses based on research and/or practice are desirable.

The position requires the willingness to engage actively in intensive interfaculty cooperation. At the Institute of Hydraulic Engineering and Water Resources Management, excellent experimental possibilities as well as comprehensive resources in numerical simulation are available in the laboratory. Active participation and further development of the hydraulic engineering laboratory and the numerical methods is expected.

REQUIREMENTS FOR EMPLOYMENT

- A university education relevant subject, including a completed doctoral degree (PhD). Degrees must comply with Austrian accreditation standards.
- An outstanding academic track record in research and teaching.
- Teaching experience and excellent didactics skills, preferably documented by an Habilitation (venia docendi) or an comparable scientific qualification.
- Proven leadership skills.

Excellent spoken and written competence in English is required, to ensure effective international representation of the field and to enable involvement in the English teaching of the master's degree program in Geotechnical and Hydraulic Engineering at Graz University of Technology. Fluency in German or the willingness to acquire it is also expected. Relocation to live in the greater Graz area is required.

Further we expect:

- Excellent teaching skills
- Commitment to teamwork and local, national, international cooperation
- An excellent track record of acquiring research funding

APPLICATION

- Submit a detailed application including the application form available at <https://www.tugraz.at/go/professorships-vacancies/>
- a C.V. (including copies of certificates and diplomas) and a description of research and teaching experience to date
- an outline of planned activities in research, teaching as well as of the development of the team with a presentation of gender and diversity competence
- a list of publications and the five most important publications as pdf-file
- in electronic form (PDF) to dekanat.bau@tugraz.at by **April 30, 2023** at the latest

The Graz University of Technology strives to increase the proportion of women, especially in leading positions and in scientific staff, and therefore expressly invites qualified women to apply. Until a balanced numerical ratio is achieved, priority will be given to women in case of equal qualifications.

Graz University of Technology actively strives for diversity and equal opportunities. Candidates must not be discriminated against on grounds of their gender, ethnic origin, religion or world view, age or sexual orientation (anti-discrimination).

Individuals with disabilities who have relevant qualifications are expressly invited to apply.
